**Result Available**

Your score: **89 / 100**

#### QUESTIONS

##### LEVEL 1 — EASY

**Q1**

Number

**Q2**

Number

**Q3**

Number

**Q4**

Pattern

4 / 4 saved

Level 1 — Easy **magic number (E)** — Number Submitted

Problem: Write a program to check whether a number is a magic number or not. (A magic number is a number in which the eventual sum of the digits is 1 when repeatedly summed.)

Sample Input:

Enter a number: 19

Sample Output:

19 is a magic number

Test Cases:

===TEST CASE 1===

Input:

Enter a number: 19

Expected Output:

19 is a magic number

===TEST CASE 2===

Input:

Enter a number: 19

Expected Output:

19 is a magic number

Your Code

```
1 #include <stdio.h>
2 int main()
3 {
4     int n,sum;
5     scanf("%d",&n);
6     while(n>9)
7     {
8         sum=0;
9
10    while(n>0)
11    {
12        sum+=n%10;
13        n/=10;
14    }
15    n=sum;
16 }
17 if(n==1)
18     {
19         printf("magic number");
20     }
21 else
22 {
23     printf("not a magic number");
24 }
25 return 0;
26 }
```

### Output

magic number
